

A modern house exterior featuring dark grey vertical cladding. A large window on the upper level reflects trees. A wooden deck leads to a glass-paned entrance door, revealing a warm interior. A concrete wall and some greenery are on the left. A small white light fixture is mounted on the dark cladding to the right of the entrance.

Matt collection available in UniCote® Coastal

The Matt Collection is available in UniCote® Coastal, offering specifiers a refined 0% gloss finish for coastal and high-exposure environments.

Combining a quiet architectural expression with the proven performance of UniCote® Coastal, the range supports enduring design outcomes backed by durability and long-term resilience.

The colours, patterns and design shown are provided as a guide only. We strongly recommend comparing your choice with an actual steel sample as colour and textural variations will apply.

Solutions for all locations

The Essential colour range is available across UniCote® Select, Coastal and Extreme, giving specifiers the flexibility to maintain colour consistency while responding to different environmental conditions.

From standard applications through to coastal and more demanding project environments, the range supports a cohesive design outcome backed by steel and aluminium solutions engineered for performance, durability and long-term resilience.

UniCote®Select

Endurance in colour steel

UniCote® Select effortlessly combines durability with aesthetic allure, showcasing an extensive array of colors and profiles. It harmoniously unites form and function, delivering impeccable quality.

Distance from marine: 1000m+

UniCote®Coastal

For that extra protection

UniCote® Coastal, the ultimate steel solution for the Australian coastline, provides unparalleled corrosion resistance to withstand the harsh conditions of marine environments.

Distance from marine: 0 - 400m+

UniCote®Extreme

For demanding environments

UniCote® Extreme sets a new standard for aluminium materials, designed for use in very severe marine environments right up to the waterline, industrial applications and high-end buildings inland.
